Viren Desai (he/him) **Computer Engineering Student**

Surrey, British Columbia virendesai711@gmail.com | 604-906-1577

TECHNICAL SKILLS

Web / Embedded Systems
- Next.js
- React
- Arduino, FPGA, STM32

Tools / Platforms
- Unity
- GitHub
- VS Code

Languages
- C++, Python, Java
- TypeScript, HTML
- SystemVerilog

EDUCATION

University of British Columbia **Expected Graduation: May 2028**
Bachelor of Applied Science – Computer Engineering
Co-op: Available beginning May 2026

TECHNICAL WORK EXPERIENCE

UBC AgroBot, Vancouver, British Columbia **January 2026 – PRESENT**
Firmware Engineer
- Develop robust power management firmware on STM32 platforms, focusing on real-time data monitoring and system health logic
- Engineer efficient power-switching logic and charging protocols that maximize energy transfer between subsystems for extended field operation

Playland National Exhibition, Vancouver, British Columbia **August 2025 – September 2025**
Ride Operator
- Performed routine diagnostics and troubleshooting of mechanical and software issues, making precise system adjustments as needed
- Operated and monitored computer-controlled ride systems to ensure optimal safety and performance

OTHER WORK EXPERIENCE

Options Community Services, Surrey, British Columbia **May 2025 – August 2025**
Community Services Worker
- Welcomed newcomers and immigrants in navigating settlement processes, providing guidance on housing, education, and community resources to facilitate integration into Canadian society
- Delivered job market orientation and employment readiness support, including résumé development, interview preparation, and digital literacy training tailored to diverse cultural and professional backgrounds

Surrey FC, Surrey, British Columbia **April 2023 – July 2024**
Soccer Coach
- Planned and led weekly training sessions for youth players, focusing on skill development, teamwork, and strategic game play
- Coordinated match schedules, managed player development plans, and fostered a positive, inclusive team environment that encouraged sportsmanship and growth

TECHNICAL PROJECTS

AI Hub, Personal Project **February 2026 – PRESENT**
- Architected a full-stack web application using Next.js and Tailwind CSS to automate content broadcasting
- Integrated AI-driven features to streamline media production and user interaction

UBC Finds, Course Project **September 2025 – December 2025**
- Collaborated on a full-stack interactive map application using Java and TypeScript to streamline campus navigation
- Implemented asynchronous data fetching and state management to ensure real-time updates of location markers and user search results

Cryptocurrency Python Web Scraping, Personal Project **October 2024 – January 2025**
- Developed Python scripts using Requests and BeautifulSoup to scrape and parse real-time cryptocurrency market data from multiple online sources
- Processed and analyzed extracted datasets to identify price trends, generate visual reports, and support data-driven decision-making for trading strategies

First Person Shooter Unity Game, Personal Project **June 2022 – August 2023**
- Developed an interactive 3D shooter featuring complex player mechanics including sprinting, jumping, and a multi-weapon inventory system
- Programmed custom game state logic to handle scoring, health systems, and win/loss conditions.

VOLUNTEER EXPERIENCE

Hot Potato Initiative, Surrey, British Columbia **September 2022 – June 2024**
President
- Raised funds and organized community events to support homelessness initiatives

AWARDS

AP Scholar Award 2023
Earned for completing three Advanced Placement courses in good standing.
